Employment Offer:
Project Manager for Global Technical Support

Company: **Mitsubishi Materials Corp.**,
Advanced Materials and Tools Business Unit,
R&D-Division, Machining Technology Center

Business Profile:

The Advanced Materials and Tools Business Unit provides an extensive lineup of cutting tools used for lathe turning, milling, and drilling, as well as abrasion-resistant tools and construction tools. These products are manufactured in Japan and overseas, sold in global markets, and have a leading share in the Japanese market. By the early 2020s we aim to garner a world market share of more than 10% for cemented carbide products, targeting the automotive, aircraft and medical industries.

Our Machining Technology Centers provide all kinds of technical support to domestic and overseas sales organizations and customers: Besides trainings on cutting technology and tools, we provide increasingly solution services like tool analyses, cut simulations (CAE, CAM), test cuts and the optimization of cutting conditions to continuously improve our customers' manufacturing processes in terms of efficiency, cost and quality.

Position Profile:

The new position has been created to improve the global transfer of upper support and services from Japan to overseas as well as among the regional sales organizations in Europe, India, SE-Asia, China, Brazil, Mexico and the USA. As member of our global team, you will coordinate regular meetings and workshops and ensure progress and contributions from each region. The position is in full-time, based in Omiya, Japan. The salary is negotiable.

Qualification Profile:

- Project management skills (set up project structure and -schedule, organize meetings, VC's, workshops, accommodations, follow-up of activities and timely escalation in case of delay),
- English and Japanese: business-fluent.
Intercultural background, Chinese or Spanish would be a +.
- Familiar with Microsoft Office, especially.xls, .ppt and word.
- Self-motivated, problem solving attitude, communicative, reliable and taking responsibility,
- Technical background, business experience or interest in IT / data management would be welcome.
